

### Brief Specification

Complete Electrical refurbishment over 4 floors for a leading broadband supplier in the centre of Sheffield.

EME were responsible for the complete electrical infrastructure installation including the installation of a new LV switch panel, new Distribution boards throughout the office floors, relocation of the existing UPS systems and modification to the main Comms Room UPS extension; tea point facilities on each level including the installation of electrical services to a new kitchen and associated mechanical equipment supplies including roof mounted AHU's. Electrical supplies to the new roof mounted condensers, Comms Room CRAC units and ceiling mounted AC systems within the offices. The installation of a new intelligent lighting control system throughout with dimmable lighting and a new general power containment and cabling installation to service the open plan CAT B areas on all floors.

Project Type: Traditional fixed price designed contract for Overbury Regions (Manchester)

Project Duration: Commenced January 2012, completed June 2012

Project Value: £1,250,000
